

Where the executions are

Frank R. Baumgartner

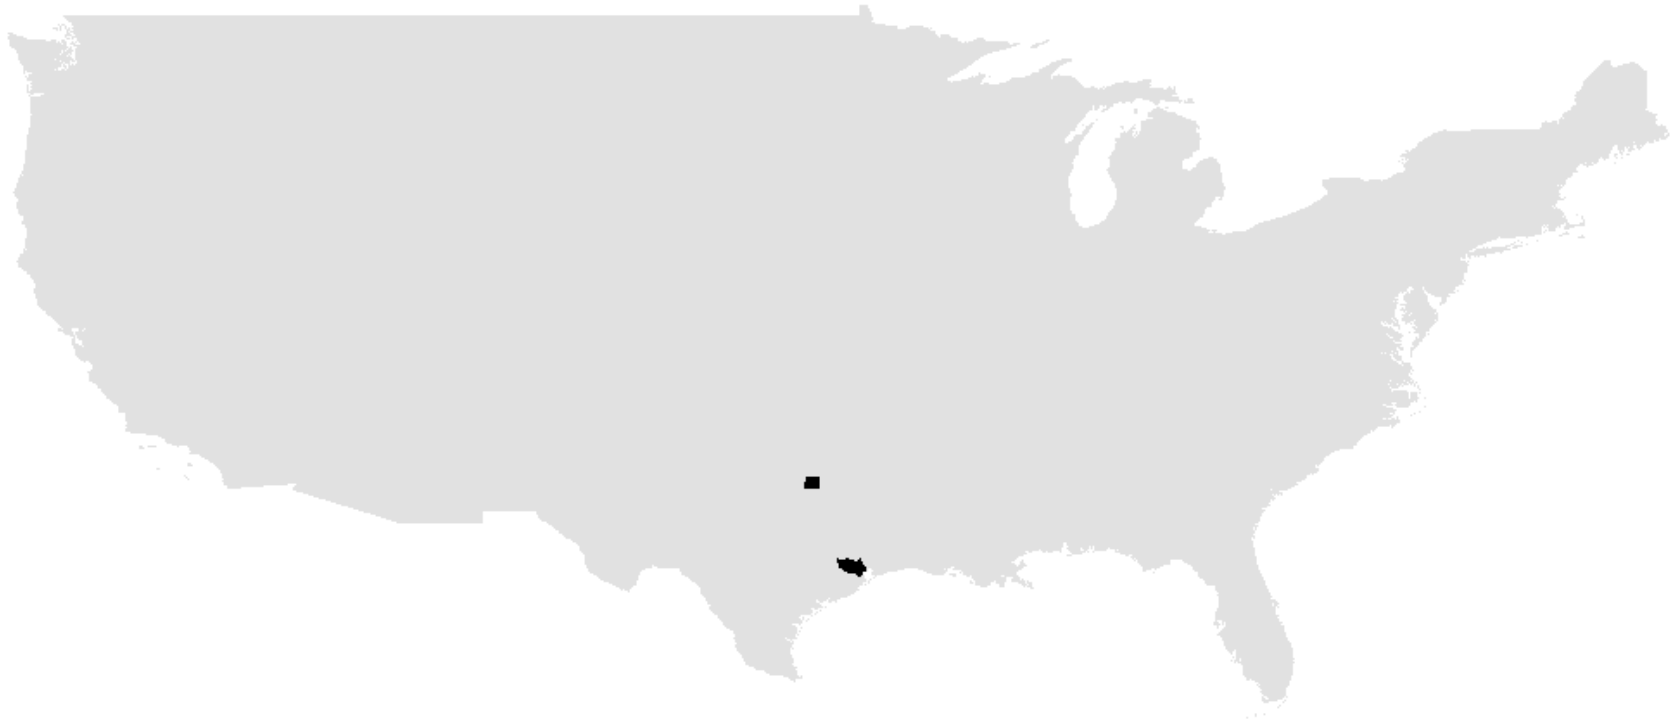

Introduction

- Data compiled on all US executions since 1976 as of April 11 2011, 1245 executions in total.
- Maps by county do not include 3 executions by the federal government not assigned to any county.
- First map shows traditional shading by number of executions.
- Subsequent maps start with the highest number of executions and proceed in order down to all counties with at least one execution.
- Flipping through the maps quickly shows the geographical concentration especially in those with 10 executions or more.
- Thanks to UNC students BJ Dworak, Matt Nolan, Linden Wait, and Amber Clifford for research assistance

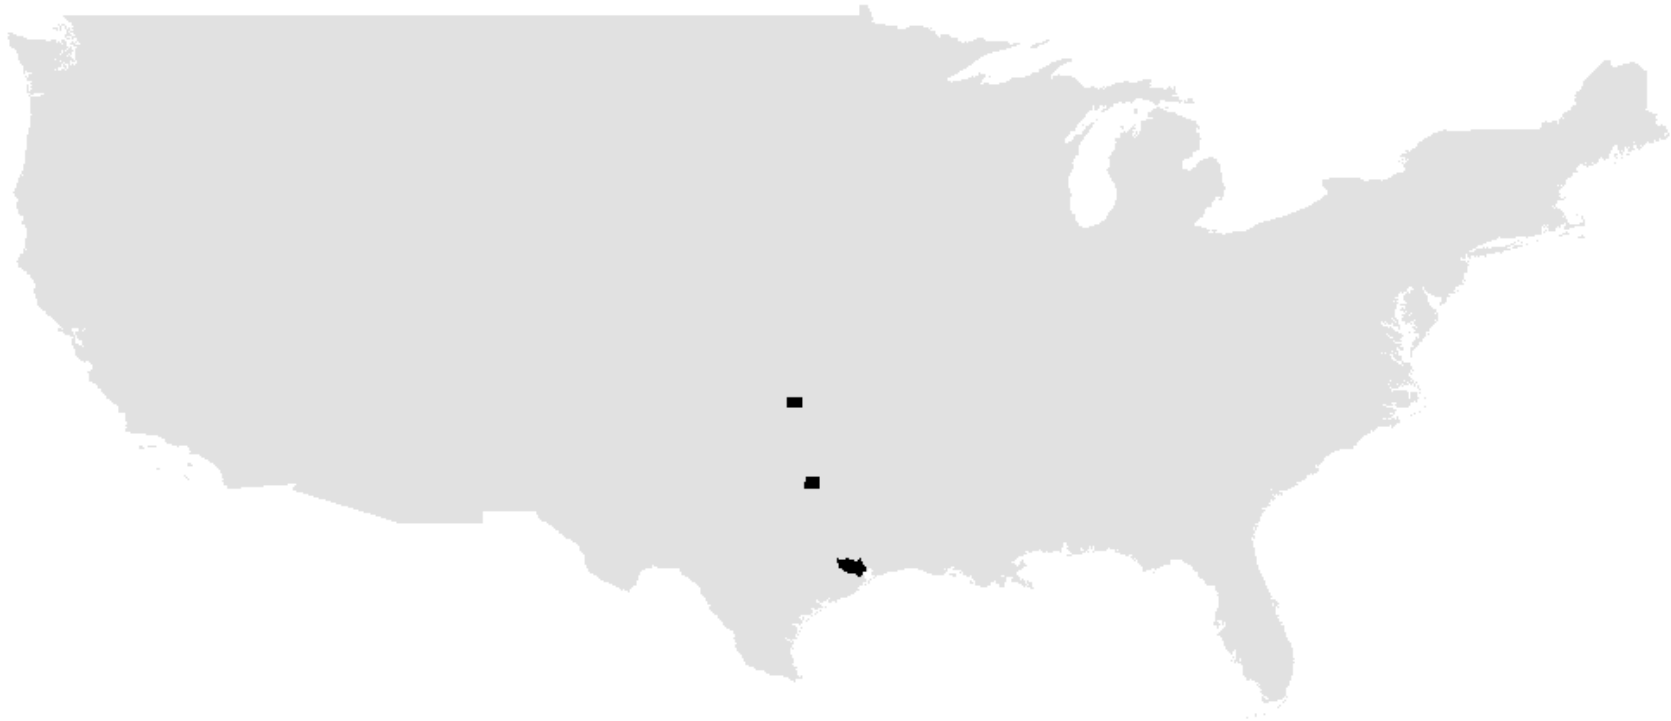

Counties with 116 or more executions since 1976

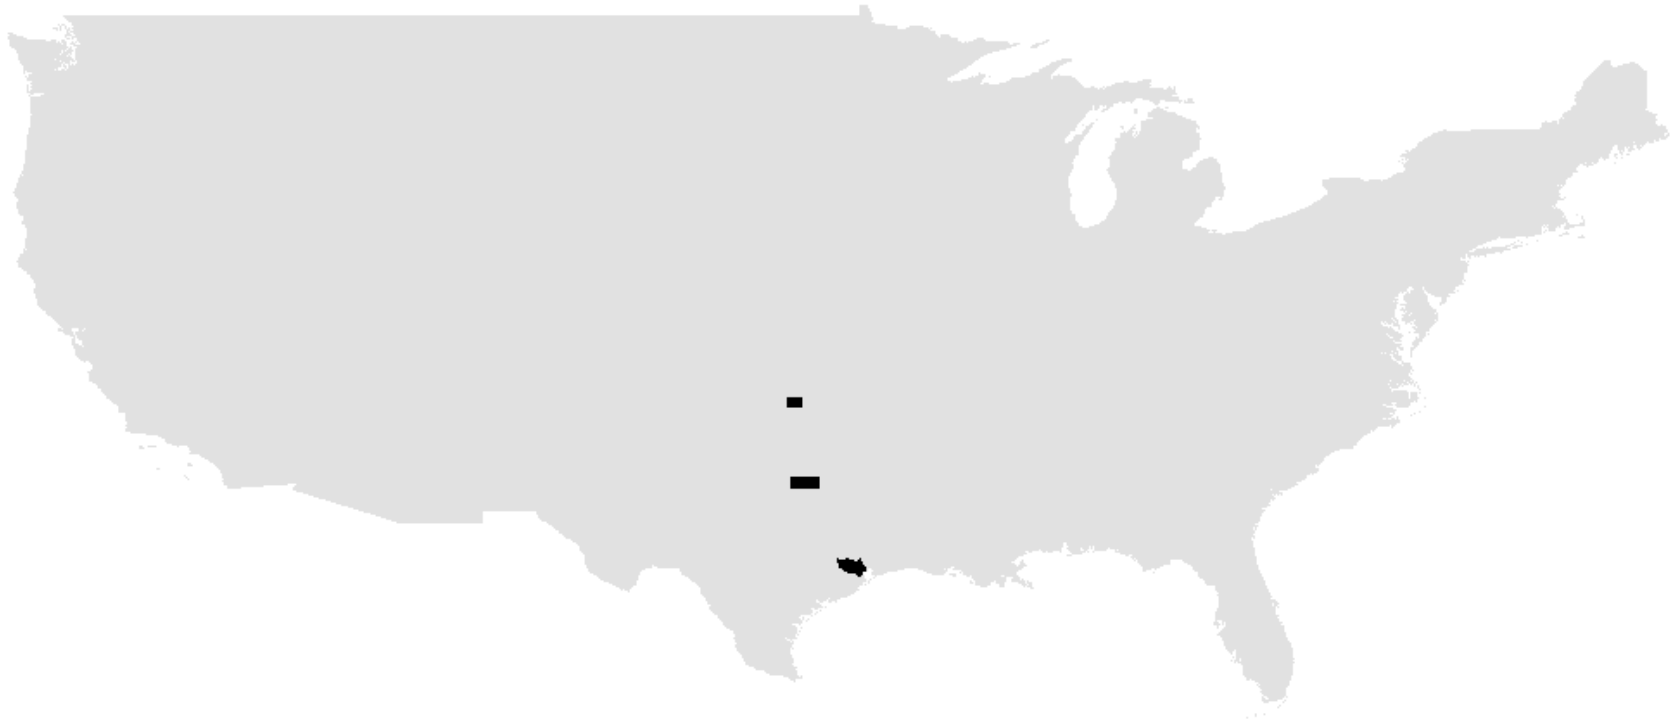

Counties with 44 or more executions since 1976

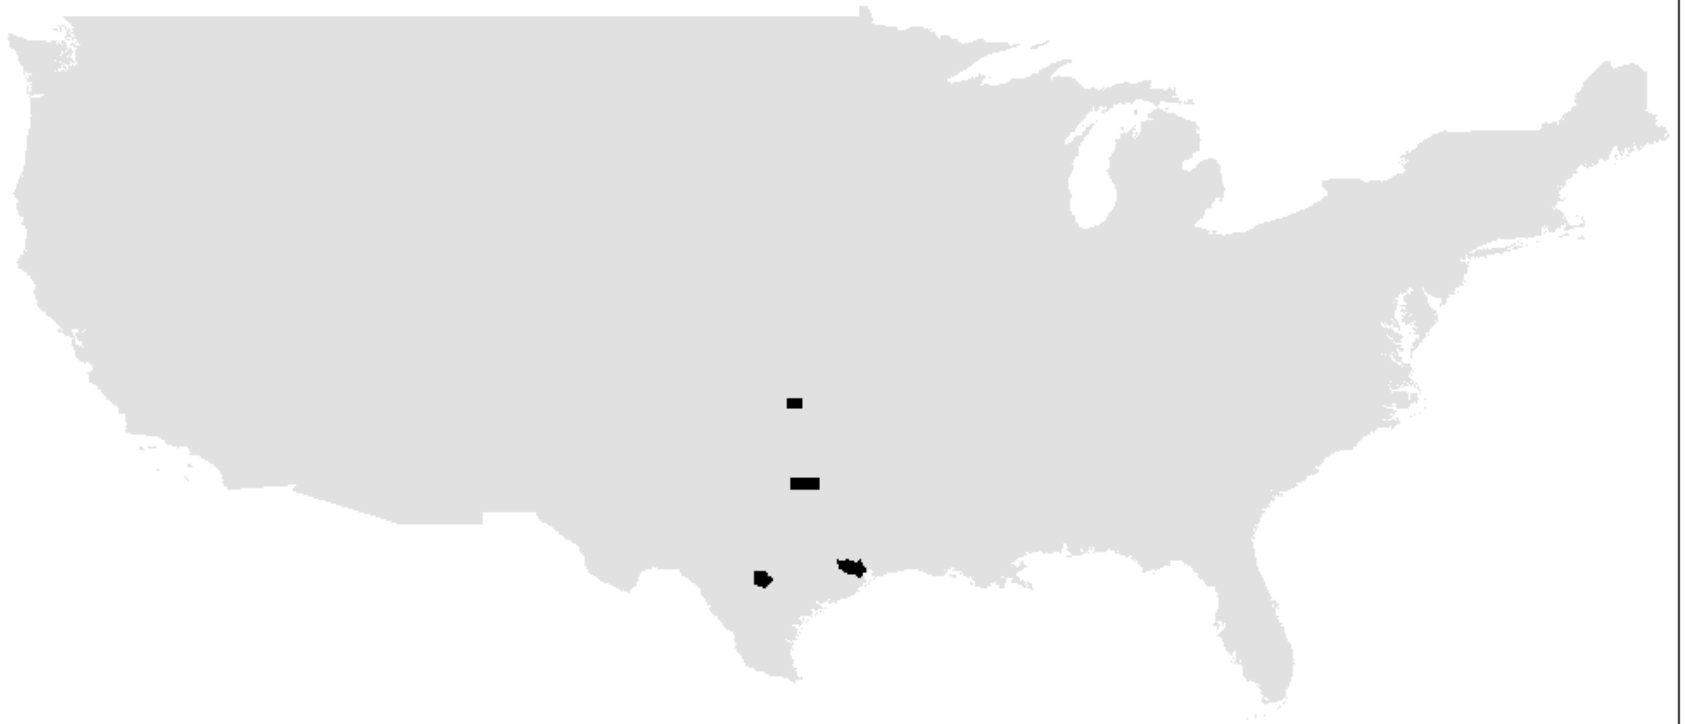

Counties with 36 or more executions since 1976

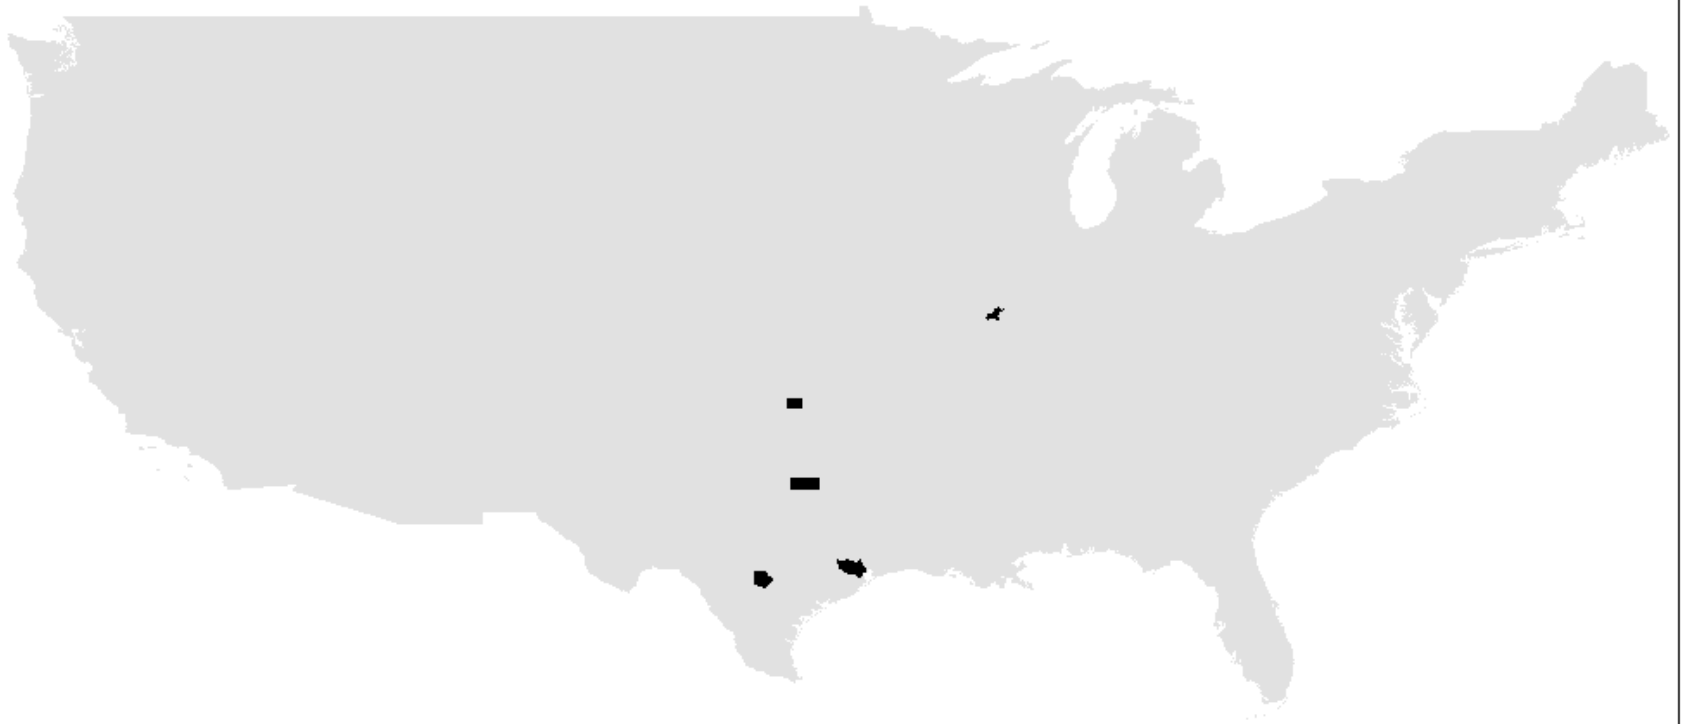

Counties with 35 or more executions since 1976

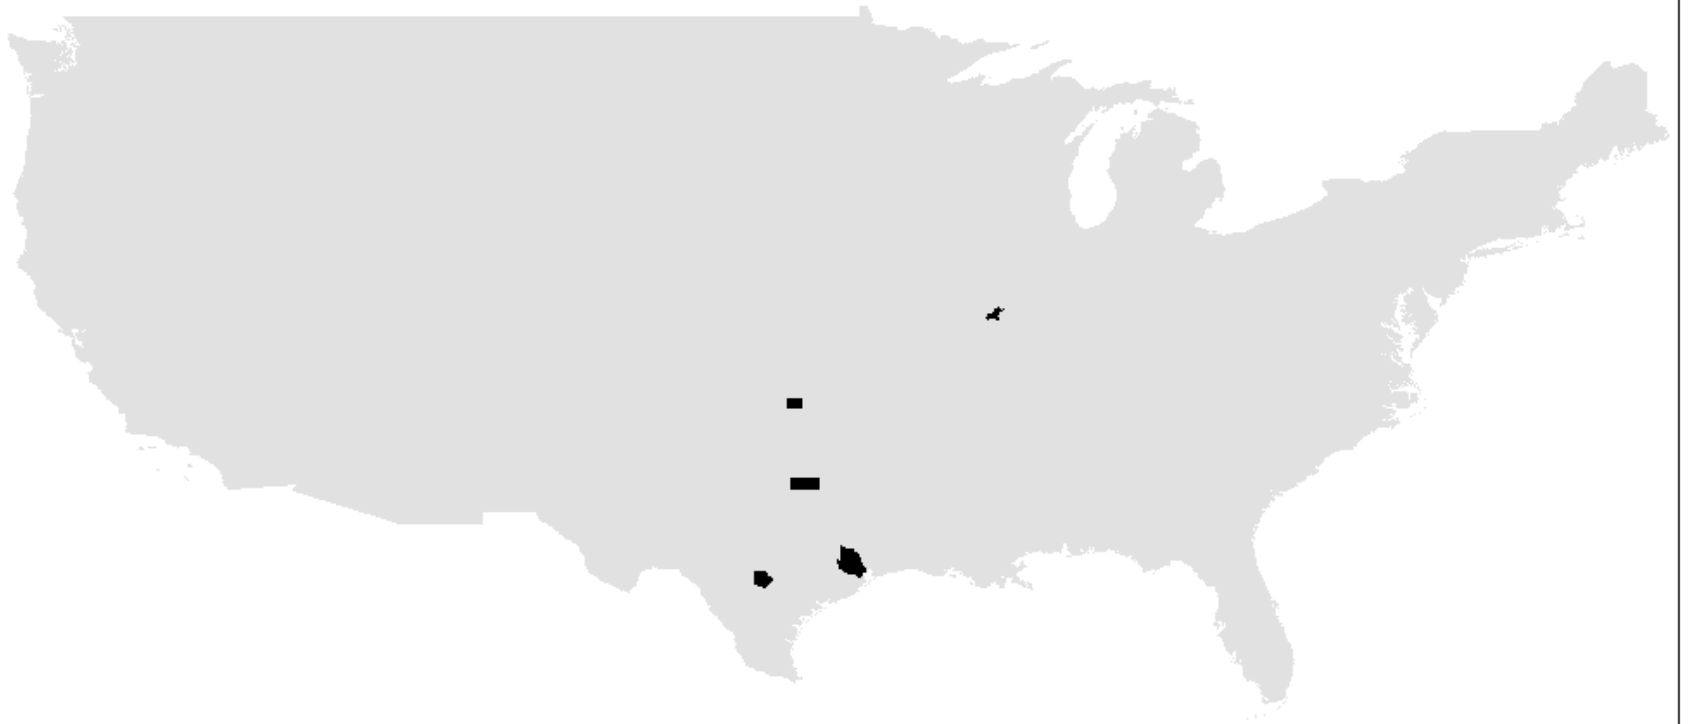

Counties with 31 or more executions since 1976

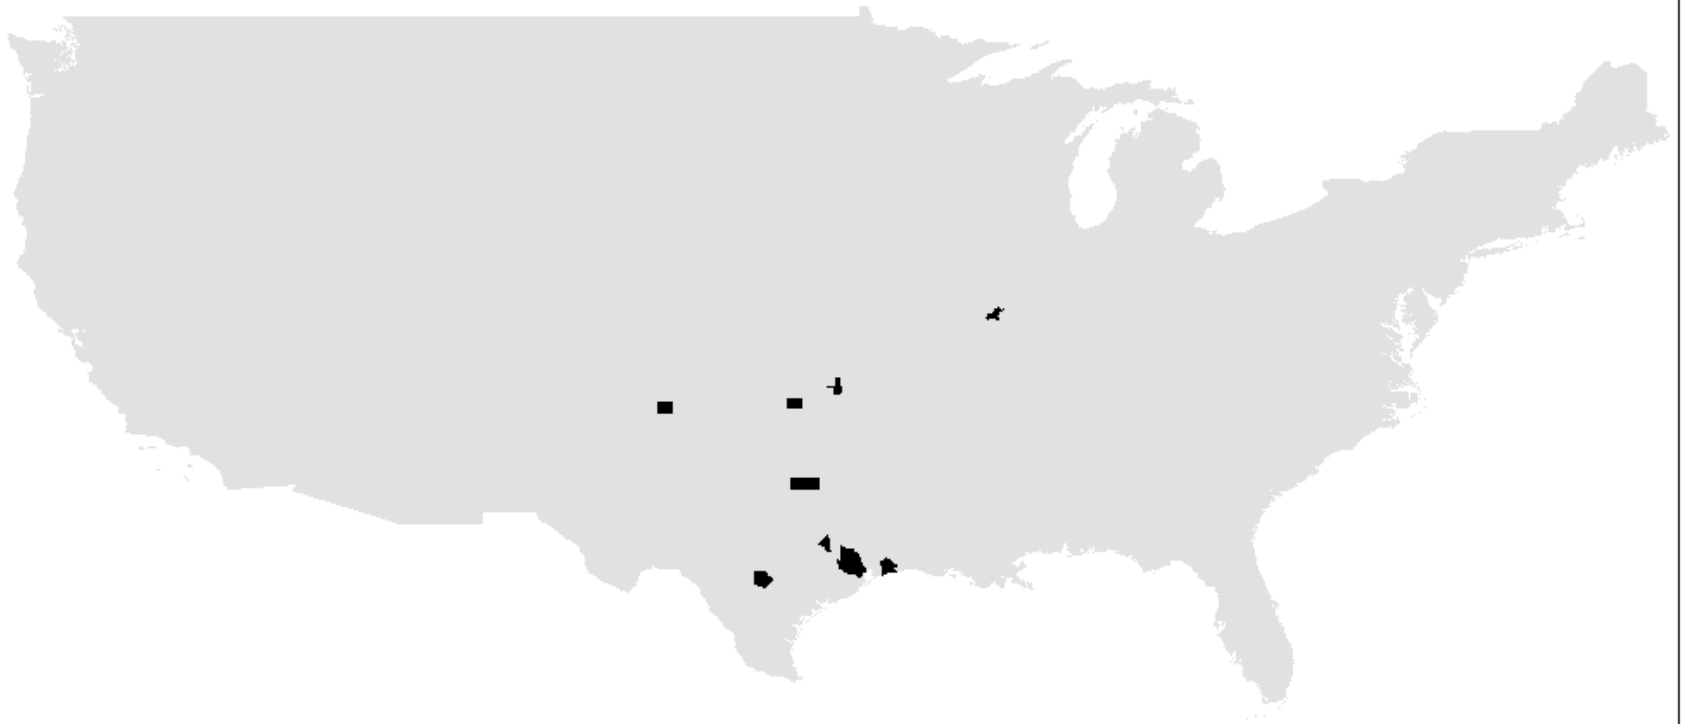

Counties with 17 or more executions since 1976

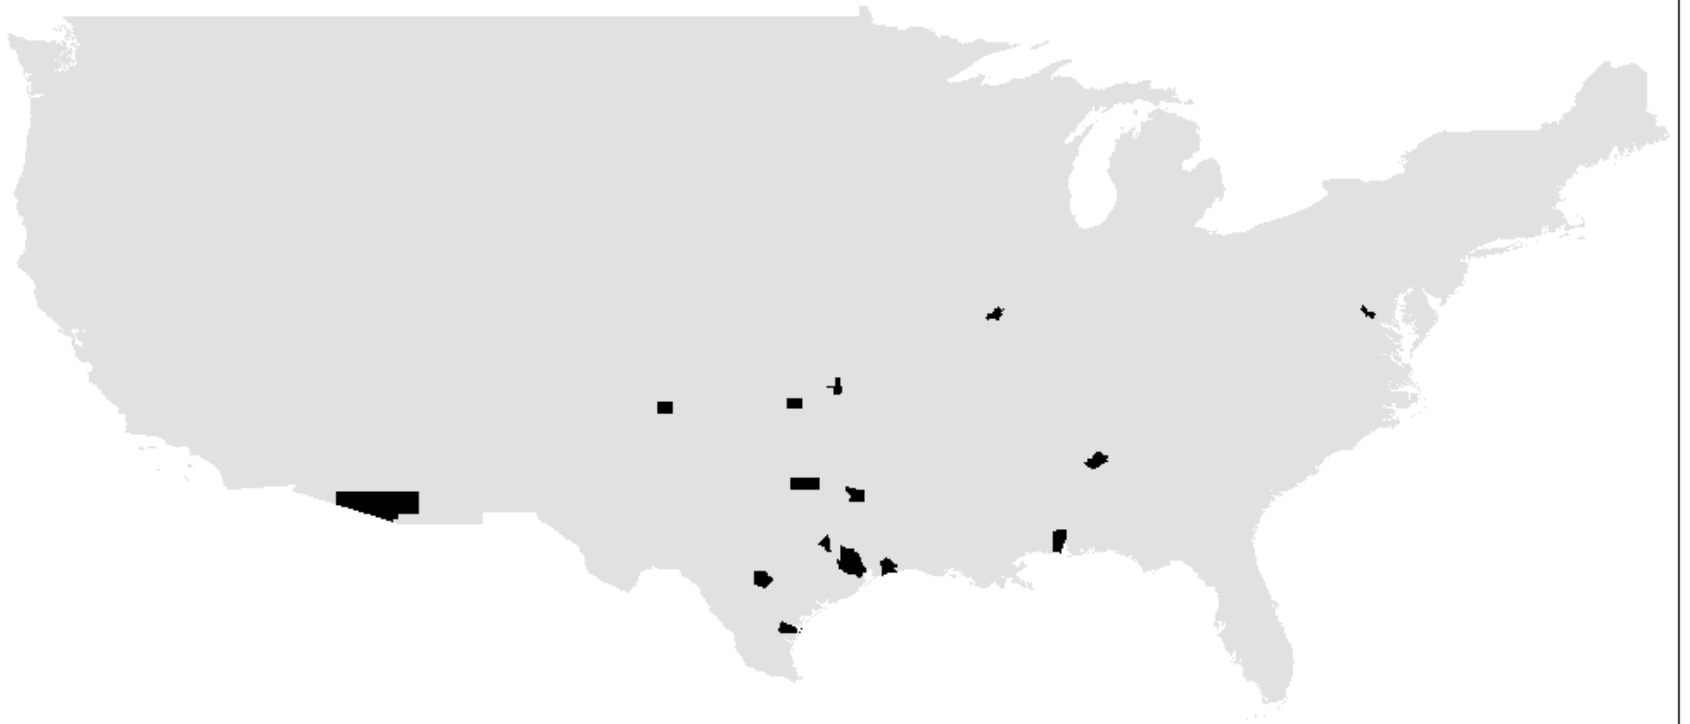

Counties with 14 or more executions since 1976

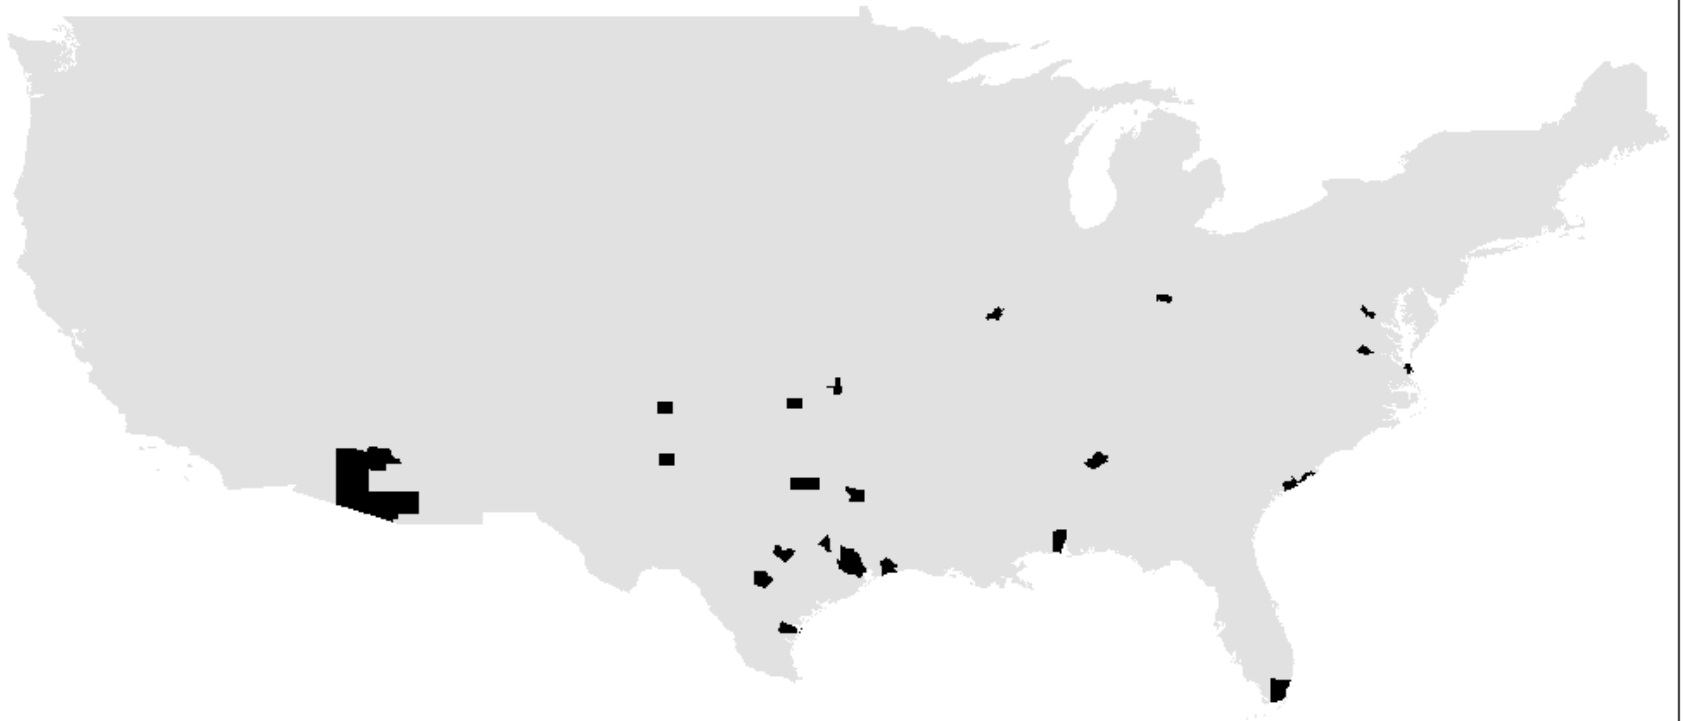

Counties with 11 or more executions since 1976

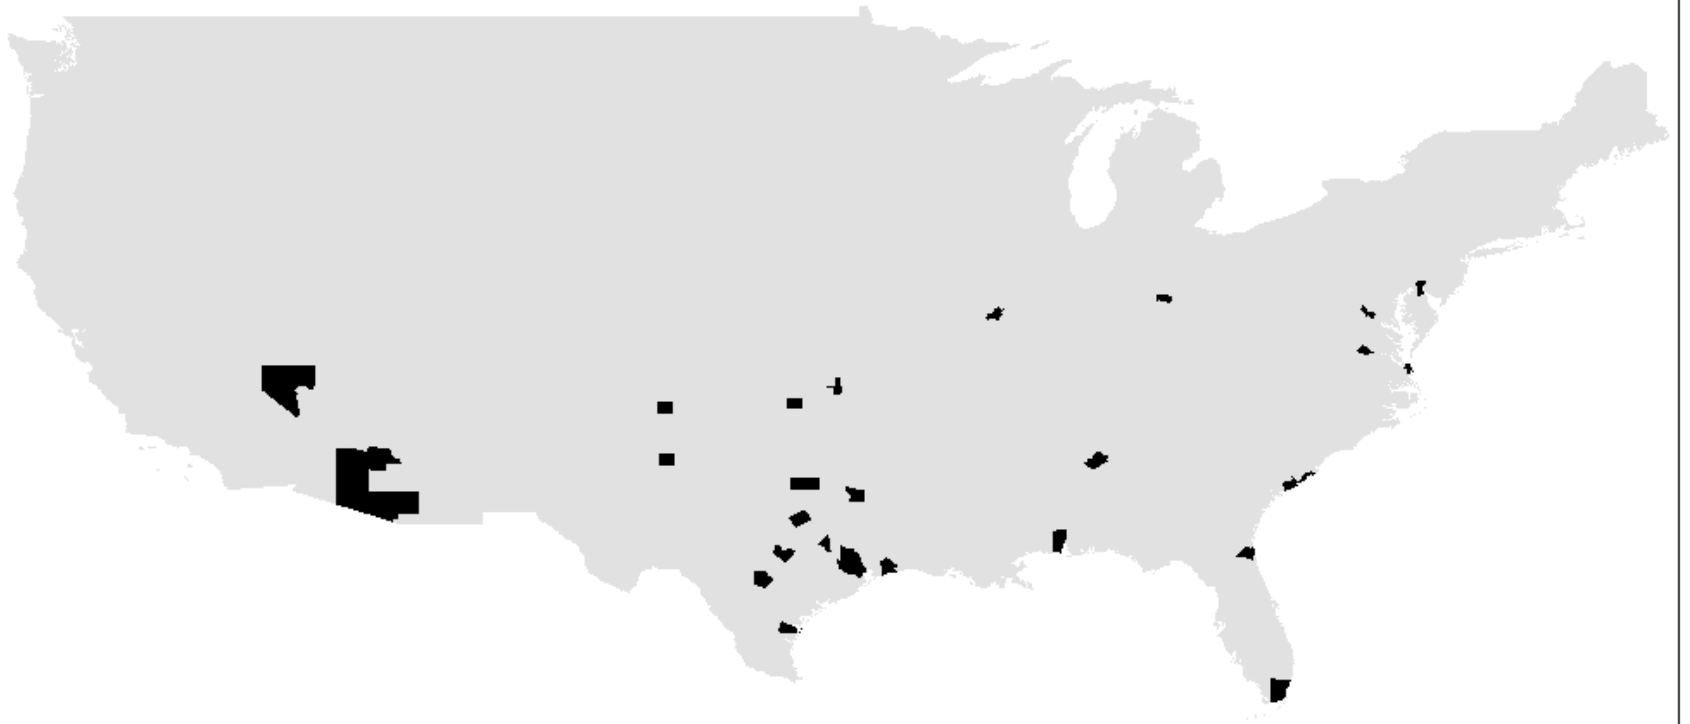

Counties with 9 or more executions since 1976

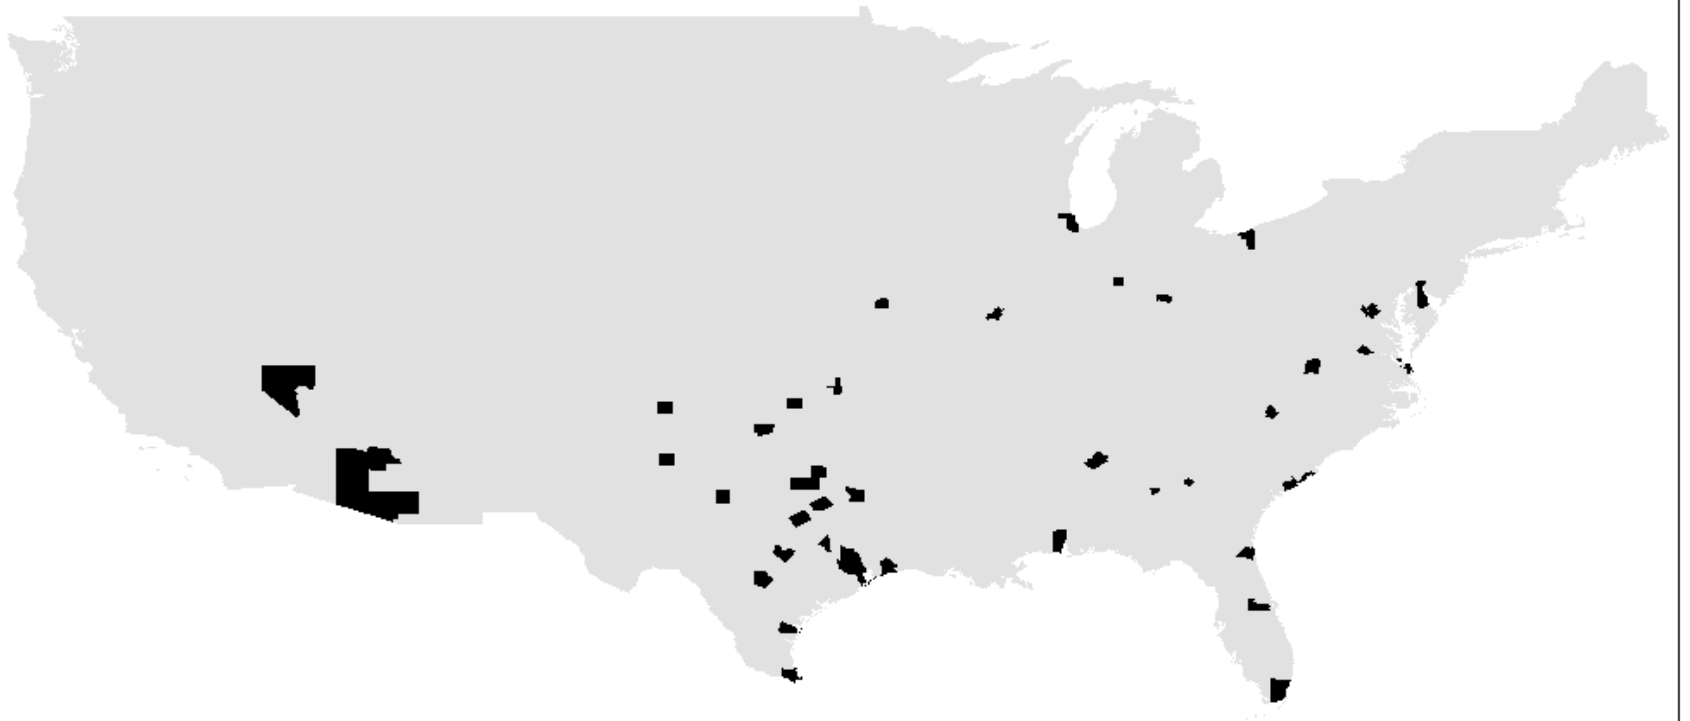

Counties with 8 or more executions since 1976

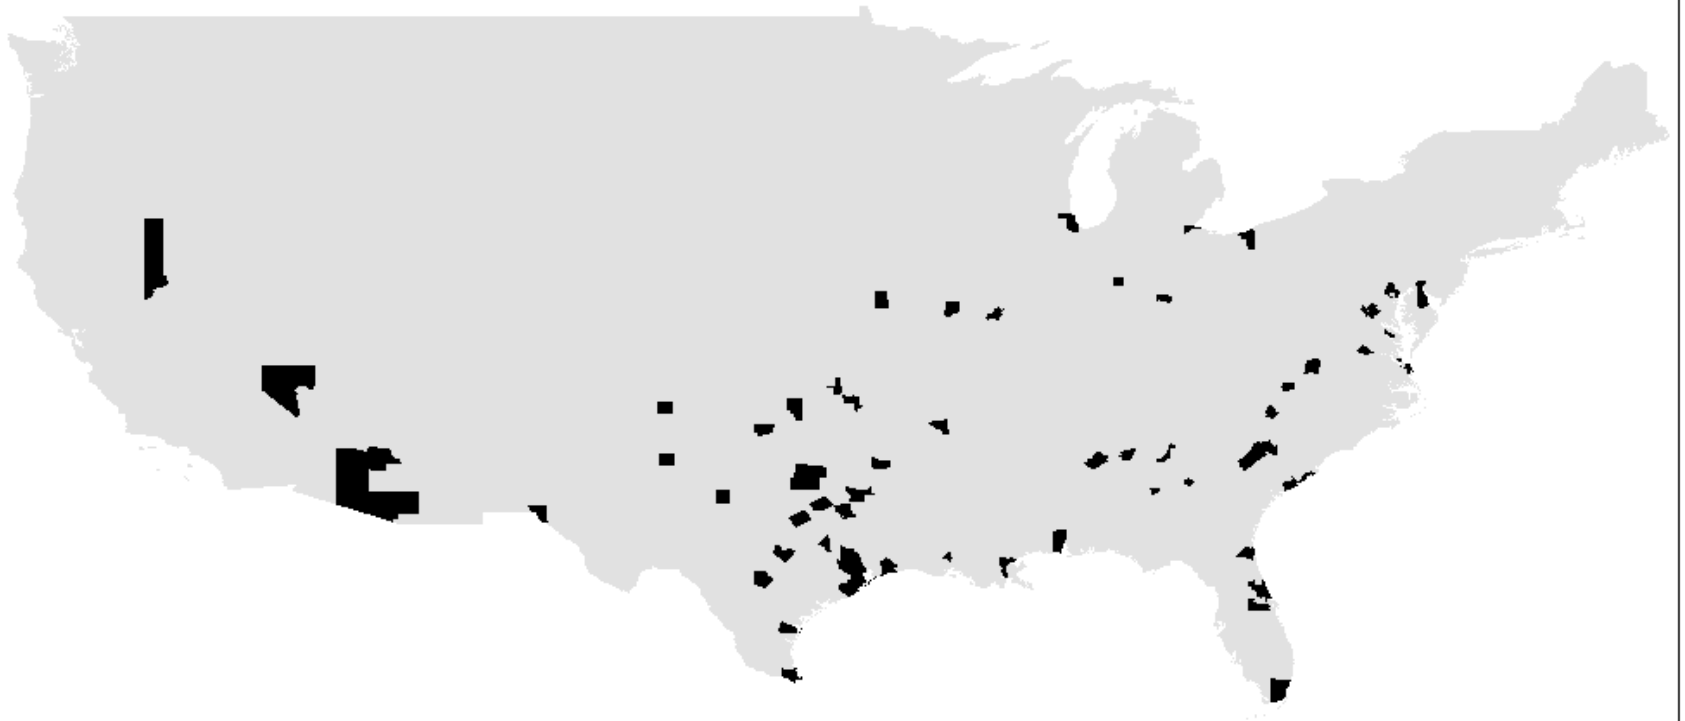

Counties with 7 or more executions since 1976

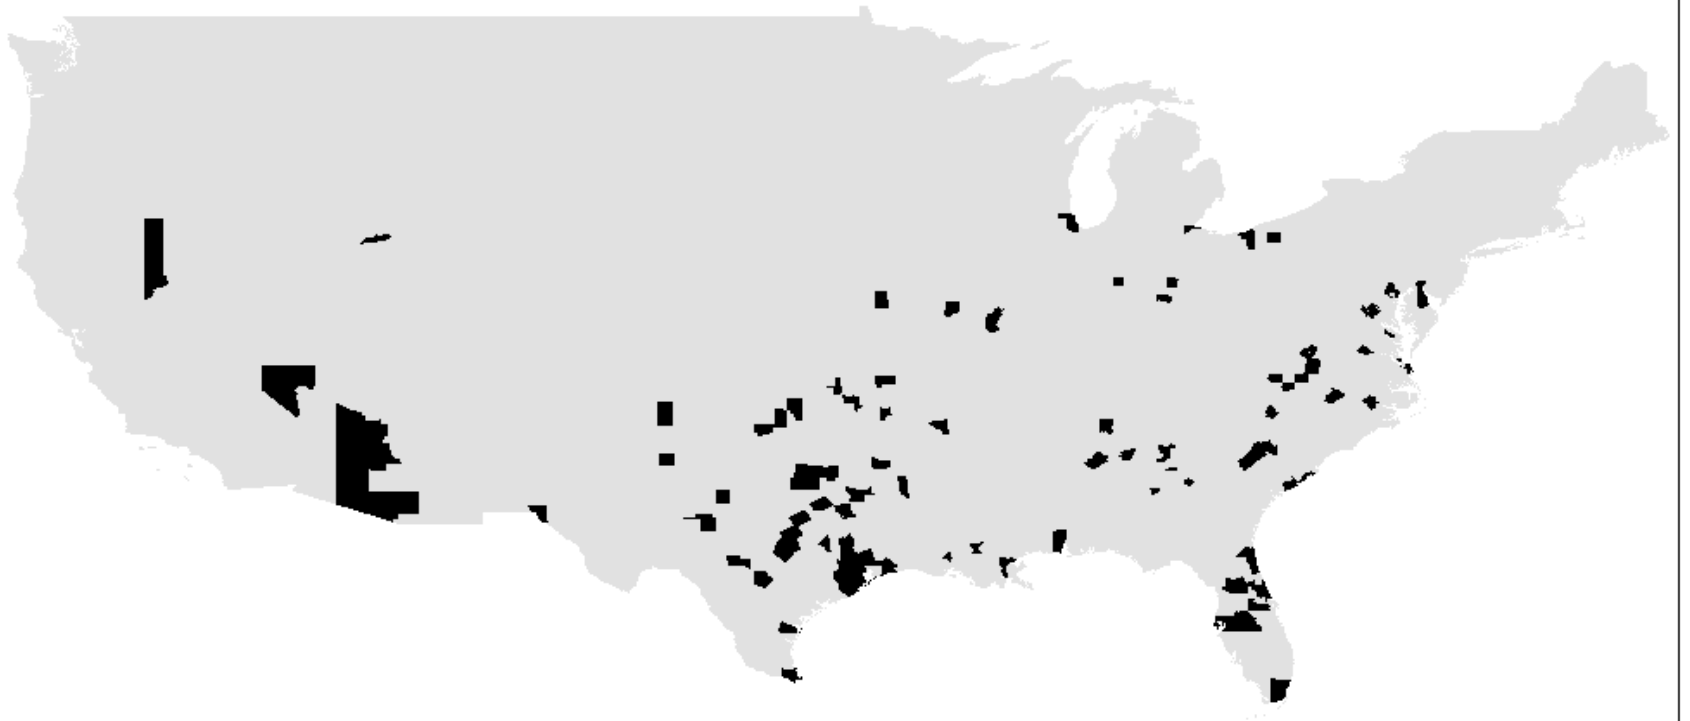

Counties with 5 or more executions since 1976

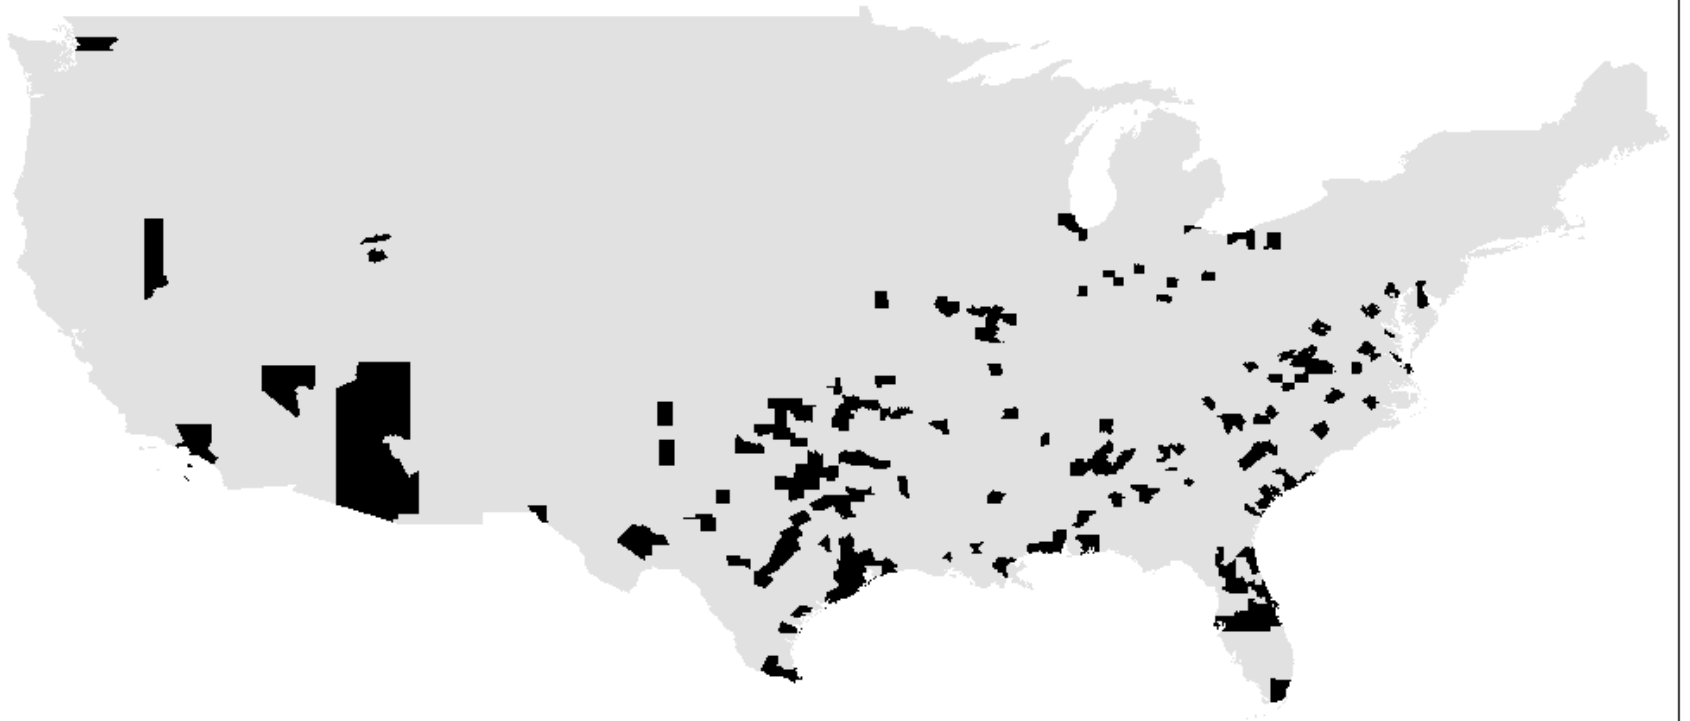

Counties with 4 or more executions since 1976

Counties with 3 or more executions since 1976

Counties with 2 or more executions since 1976

Counties with 1 or more executions since 1976
