Obligation of Federal Highway Funds, FY 2001

February 2001

March 16, 2001

Washington, D.C. – In February 2001, \$2.55 billion of federal highway funds were obligated by state and local departments of transportation (DOT) for highway and bridge projects, a 13.8% increase over the amount obligated in February 2000, according to an analysis of Federal Highway Administration data by the American Road and Transportation Builders Association. Obligation of federal funds is the first step in bringing federal-aid highway and bridge projects to construction.

During the first five months of federal fiscal year 2001, a total of \$13.31 billion of federal highway funds was obligated for highway and bridge projects, 19.5% more than during the first five months of FY 2000. To date, states have obligated 47.5.0 percent of their formula funds, which must be used during the year or lost, and 20.6 percent of their Minimum Guarantee, High Priority Project and Appalachian highway funds, which are available until used.

When a state or local DOT has an eligible project ready to go under the federal-aid highway program, it enters into a project agreement with the Federal Highway Administration (FHWA) which obligates the federal government to pay its share of the project cost. The project can then proceed to bidding and construction. Under the Transportation Equity Act for the 21st Century (TEA-21), federal aid to the states for highway and bridge projects will increase about 50 percent. As states obligate these funds for projects, lettings and construction work should also rise significantly.

Federal Highway Funds Obligated by the States

[Billions of dollars]

American Road and Transportation Builders Association

For sale by the American Road and Transportation Builders Association, 1010 Massachusetts Ave., N.W., Washington, DC 20001 Phone: 202-289-4434 Data provided by the U. S. Federal Highway Administration. ARTBA comments and analysis do not necessarily reflect the views of the FHWA.

Highlights:

- Amount of funds obligated. Obligation of federal highway funds by federal, state and local Departments of Transportation (DOT) hit a record \$13.31 billion during the first five months of FY 2001, an increase of \$2.17 billion dollars or 19.5 percent over the first five months of FY 2000. Thirty-two states (one fewer than in January) and the District of Columbia are ahead of their year-ago pace, while eighteen states are behind last year's pace. State by state data are shown in Table 1. Obligation of federal funds is the first step in the process of bringing federal-aid highway and bridge projects to construction and thus can be an early signal of future construction activity.
- Increase or decrease from FY 2000. States showing the largest dollar increases were Pennsylvania, Maryland and New Jersey, while Maryland, South Carolina and Rhode Island showed the largest percentage increases. Largest decreases in dollar terms were registered by Illinois, Arkansas and West Virginia, while the largest percentage decreases were in Arkansas, Oregon and Nevada. Details are shown in Table 2. State by state performance in obligating federal funds can be an early signal of future state highway market trends.
- Percent of funds obligated. During the first five months of FY 2001, the states obligated 47.5 percent of their formula funds. Formula funds must be obligated during the fiscal year or returned to FHWA for redistribution to other states. This is somewhat ahead of the 44.9 percent pace of last year. State DOTs also obligated 20.6 percent of their Minimum Guarantee, High Priority Project and Appalachian Highway program funds, up from 14.9 percent a year ago. These funds are available until used and are not lost if they are not obligated during the fiscal year¹. State by state details are shown in Table 3.
- Funds remaining. As of the end of February 2001, states still had \$17.45 billion of obligation authority remaining. This was about \$270 million more than a year ago. States by state details are shown in Table 4. Funds remaining indicate the potential additional market growth that can occur in each state during the remainder of the fiscal year.
- Transfers to Federal Transit Administration. As of February, the state Departments of Transportation had transferred \$339.0 million of federal highway program funds to the Federal Transit Administration for transit uses. While permitted under the federal highway program rules, transfers to the FTA reduce the amount of funds available for highway construction. During FY 2000, the state DOTs transferred a total of \$1.7 billion of highway program funds to the FTA and they are currently about \$190 million ahead of last year's pace. Table 5 shows the state by state details.
- Summary. Overall, the increased pace of obligation of federal highway funds so far in FY 2001 continues to be an encouraging sign of future highway and bridge construction activity. The increase over FY 2000 grows larger as the year progresses. Particularly encouraging is the increase in the percent of Minimum Guarantee, High Priority Project and Appalachian highway funds obligated during FY 2001, because there is no time pressure to obligate these funds. Since highway projects take time to plan and let, the strongest impact of the FY 2001 increase should occur during the 2002 highway construction season.

¹ Note that the base for calculating the percent of funds obligated is the sum of the new obligation authority received during the fiscal year for these programs plus any unused obligation carried forward from previous years. © 2001 American Road and Transportation Builders Association 2
