Obligation of Federal Highway Funds, FY 2001

June 2001

July 27, 2001

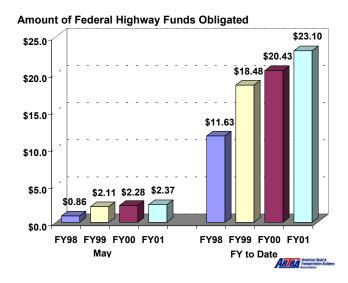

Washington, D.C. – In June 2001, \$2.37 billion of federal highway funds were obligated by state and local departments of transportation (DOTs) for highway and bridge projects, 4.3% more than was obligated in June 2000, according to an analysis of Federal Highway Administration data by the American Road and Transportation Builders Association.

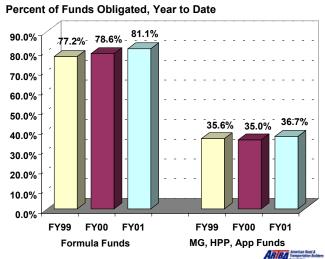

During the first nine months of federal fiscal year 2001, a total of \$23.10 billion of federal highway funds was obligated for highway, bridge and related projects, 13.0% more than during the first nine months of FY 2000. To date, states have obligated 81.1 percent of their formula funds, which must be used during the year or lost, and 36.7 percent of their Minimum Guarantee, High Priority Project and Appalachian highway funds, which are available until used. Both figures are well ahead of last year's pace.

When a state or local DOT has an eligible project ready to go under the federal-aid highway program, it enters into a project agreement with the Federal Highway Administration (FHWA) which obligates the federal government to pay its share of the project cost. The project can then proceed to bidding and construction. Under the Transportation Equity Act for the 21st Century (TEA-21), federal aid to the states for highway and bridge projects will increase about 50 percent. As states obligate these funds for projects, lettings and construction work should also rise significantly.

Federal Highway Funds Obligated by the States

[Billions of dollars]

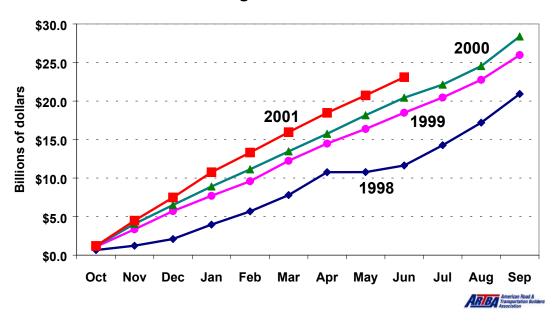

American Road and Transportation Builders Association

For sale by the American Road and Transportation Builders Association, 1010 Massachusetts Ave., N.W., Washington, DC 20001 Phone: 202-289-4434 Data provided by the U. S. Federal Highway Administration. ARTBA comments and analysis do not necessarily reflect the views of the FHWA.

Highlights:

• Amount of funds obligated. Federal, state and local Departments of Transportation (DOT) obligated a record \$23.10 billion of federal highway program funds during the first nine months of FY 2001, an increase of \$2.67 billion dollars or 13.0 percent over the first nine months of FY 2000. Obligation of federal funds is the first step in the process of bringing federal-aid highway and bridge projects to construction and thus can be an early signal of future construction activity. Thirty-four states are ahead of their year-ago pace (five less than in May). Sixteen states and the District of Columbia are behind last year's pace, although the shortfalls are generally small and shrinking. State by state data are shown in Table 1, while cumulative total data are shown in the chart below.

Cumulative Obligation of Federal Highway Program Funds

- Increase or decrease from FY 2000. States showing the largest dollar increases during the first nine months of FY 2001 were California, Pennsylvania, and Virginia, while Maryland, Virginia and Delaware showed the largest percentage increases. California has transferred much less highway money to the Federal Transit Administration during the 1st nine months of FY 2001 than during the same stretch of FY 2000, putting \$335 million more of its federal funds into highway and related projects this year than last. Virginia and Maryland are also substantially ahead of last year's pace, largely because of major highway and bridge projects cranking up in those states. Largest decreases in dollar terms were registered by Georgia, Nevada and New York while the largest percentage decreases occurred in Nevada, West Virginia and the District of Columbia. Details are shown in Table 2. State by state performance in obligating federal funds can be an early signal of future state highway market trends.
- Percent of funds obligated. During the first nine months of FY 2001, the states obligated 81.1 percent of their formula funds. Formula funds must be obligated during the fiscal year or returned to FHWA for redistribution to other states. This is somewhat ahead of the 78.6 percent pace of last year. State DOTs have also obligated 36.7 percent (\$4.54 billion) of their available Minimum Guarantee, High Priority Project and Appalachian Highway program

funds so far this year, up from the year-ago pace of 35.0 percent (\$4.17 billion). These funds are available until used and are not lost if they are not obligated during the fiscal year¹. State by state details are shown in Table 3.

- Funds remaining. As of the end of May 2001, states still had \$8.74 billion of obligation authority remaining. This was \$219 million more than remained at this time a year ago. States by state details are shown in Table 4. Funds remaining indicate the potential additional market growth that can occur in each state during the remainder of the fiscal year. Slightly less than half of the available funds (\$4.2 billion) are formula funds which must be (and will be) obligated before the end of the fiscal year. The buildup in unobligated special program funds, however, is a concern. Most of these unobligated funds are for high priority projects. Federal funds for these projects were earmarked in TEA-21 by Members of Congress, but states are still required to put up matching funds. If state DOTs have other priorities for available matching funds, some of the high priority project money may sit idle for years. Given this possibility, the \$8.74 billion of unobligated funds probably greatly overstates the amount that could be obligated by year end.
- Transfers to Federal Transit Administration. As of May, the state Departments of Transportation had transferred \$859.8 million of federal highway program funds to the Federal Transit Administration to be used for transit capital and operating expenses. While permitted under federal highway program rules, transfers to the FTA reduce the amount of funds available for highway construction. During FY 2000, the state DOTs transferred a total of \$1.7 billion of highway program funds to the FTA and they are currently about \$244 million behind last year's pace. Table 5 shows the state by state details.
- Summary. Overall, state DOTs continue to obligate record amounts of federal funds in FY 2001 for highway, bridge and related projects. The total amount of federal funds obligated so far this year is \$23.10 billion, \$2.67 billion more than the states had obligated at this time last year. Most states are well ahead of last year's pace in obligating their federal highway funds. Some states are still behind last year's pace, but the amounts are generally small and the gaps have generally been shrinking. Not only are all states likely to obligate all of their available formula funds, which must be obligated before the end of the fiscal year or turned back to FHWA for distribution to other states, they have also stepped up obligation of Minimum Guarantee, High Priority Project and Appalachian highway funds, which are available indefinitely until used. The strong pace of obligation of federal highway funds in FY 2001 continues to be an encouraging sign of future highway and bridge construction activity. Since highway projects take time to plan and let, the strongest impact of the FY 2001 increase should occur during the 2002 and 2003 highway construction seasons.

¹ Note that the base for calculating the percent of funds obligated is the sum of the new obligation authority received during the fiscal year for these programs plus any unused obligation authority carried forward from previous years. © 2001 American Road and Transportation Builders Association 3
