Obligation of Federal Highway Funds, FY 2001

July 2001

August 2, 2001

Washington, D.C. – In July 2001, \$2.14 billion of federal highway funds was obligated by state and local departments of transportation (DOTs) for highway and bridge projects, 26.2% more than the amount obligated in July 2000, according to an analysis of Federal Highway Administration data by the American Road and Transportation Builders Association.

During the first ten months of federal fiscal year 2001, a total of \$25.24 billion of federal highway funds was obligated for highway, bridge and related projects, 14.1% more than during the first ten months of FY 2000. To date, states have obligated 88.2 percent of their formula funds, which must be used during the year or lost, and 40.9 percent of their Minimum Guarantee, High Priority Project and Appalachian highway funds, which are available until used. The largest increase (\$500 million) was recorded by California, which has transferred far less to transit this year than last and thus has significantly more available for highway projects.

When a state or local DOT has an eligible project ready to go under the federal-aid highway program, it enters into a project agreement with the Federal Highway Administration (FHWA) which obligates the federal government to pay its share of the project cost. The project can then proceed to bidding and construction. Under the Transportation Equity Act for the 21st Century (TEA-21), federal aid to the states for highway and bridge projects will increase about 50 percent. As states obligate these funds for projects, lettings and construction work should also rise significantly.

Federal Highway Funds Obligated by the States

[Billions of dollars]

American Road and Transportation Builders Association

For sale by the American Road and Transportation Builders Association, 1010 Massachusetts Ave., N.W., Washington, DC 20001 Phone: 202-289-4434 Data provided by the U. S. Federal Highway Administration. ARTBA comments and analysis do not necessarily reflect the views of the FHWA.

Highlights:

Amount of funds obligated. Federal, state and local Departments of Transportation (DOT) obligated a record \$25.24 billion of federal highway program funds during the first ten months of FY 2001, an increase of \$3.11 billion dollars or 14.1 percent over the first ten months of FY 2000. Obligation of federal funds is the first step in the process of bringing federal-aid highway and bridge projects to construction and thus can be an early signal of future construction activity. Thirty-eight states (four more than in June) and the District of Columbia are ahead of their year-ago pace. Twelve states are behind last year's pace, most by only small amounts. State by state data are shown in Table 1, while cumulative total data are shown in the chart below.

Cumulative Obligation of Federal Highway Program Funds

- State increase or decrease from FY 2000. States showing the largest dollar increases during the first ten months of FY 2001 were California, Pennsylvania, and Maryland, while Maryland, the District of Columbia and Delaware showed the largest percentage increases. California has transferred much less highway money to the Federal Transit Administration during the 1st ten months of FY 2001 than during the same stretch of FY 2000, putting \$494 million more of its federal funds into highway and related projects so far this year than last. Virginia and Maryland are also substantially ahead of last year's pace, largely because of major highway and bridge projects cranking up in those states. Georgia, Nevada and West Virginia registered the largest decreases in dollar terms while the largest percentage decreases occurred in Nevada, Nebraska and West Virginia. Details are shown in Table 2. State by state performance in obligating federal funds can be an early signal of future state highway market trends.
- <u>Percent of funds obligated.</u> During the first ten months of FY 2001, the state and local DOTs obligated 88.2 percent of their formula funds, well ahead of the 84.5 percent pace of last year. Formula funds must be obligated during the fiscal year or returned to FHWA for redistribution to other states. State and local DOTs have also obligated 40.9 percent (\$2.92 billion) of their available Minimum Guarantee, High Priority Project and Appalachian

Highway program funds so far this year, up from the year-ago pace of 39.9 percent (\$2.54) billion). These funds are available until used and are not lost if they are not obligated during the fiscal year¹. State by state details are shown in Table 3.

- Funds remaining. As of the end of July 2001, states still had \$6.85 billion of obligation authority remaining. This was \$109 million less than remained at this time a year ago. State by state details are shown in Table 4. Funds remaining indicate the potential additional market growth that can occur in each state during the remainder of the fiscal year. Somewhat less than half of the available funds are formula funds (\$2.6 billion) that must be obligated before the end of the fiscal year. In addition, there are \$4.24 billion of special program funds that remain unobligated. Most of these unobligated special funds are for high priority projects. Federal funds for these projects were earmarked in TEA-21 by Members of Congress, but in most cases states are still required to put up matching funds. If state DOTs have other priorities for available matching funds, some of the high priority project funds may sit idle for years. Given this possibility, the \$6.85 billion of unobligated funds greatly overstates the amount that will be obligated by year-end.
- Transfers to Federal Transit Administration. As of July 2001, state and local DOTs had transferred \$956.9 million of federal highway program funds to the Federal Transit Administration (FTA) to be used for transit capital and operating expenses. While permitted under federal highway program rules, transfers to the FTA reduce the amount of funds available for highway construction. During the first ten months of FY 2000, state and local DOTs had transferred \$1.33 billion of highway program funds to the FTA and they are currently about \$377 million behind last year's pace. California and Washington State report the largest cuts. It appears that total transfers of federal highway funds to the FTA in FY 2001 will top \$1 billion for the second year in a row, but the total will be substantially less than in FY 2000. Table 5 shows the state-by-state details.
- Summary. Overall, state DOTs continue to obligate record amounts of federal funds in FY 2001 for highway, bridge and related projects. The total amount of federal funds obligated so far this year is \$25.24 billion, \$3.11 billion more than the states had obligated at this time last year. Most states are well ahead of last year's pace in obligating their federal highway funds. Some states are still behind last year's pace, but the amounts are generally small. Not only are all states likely to obligate all of their available formula funds, which must be obligated before the end of the fiscal year or turned back to FHWA for distribution to other states, they have also increased their obligation of Minimum Guarantee, High Priority Project and Appalachian highway funds, which are available indefinitely until used. The strong pace of obligation of federal highway funds in FY 2001 continues to be an encouraging sign of future highway and bridge construction activity. Since highway projects take time to plan and let, the strongest impact of the FY 2001 increase should occur during the 2002 and 2003 highway construction seasons.

Corrections. The first chart in the June 2001 report labels the data as being for May. The label should read June. The data are correct for June. The paragraph on "Percent of funds obligated" in the June 2001 report gives the correct percentage of Minimum Guarantee, High Priority Project and Appalachian funds obligated through June, but the wrong dollar amounts. The correct dollar amounts are \$2.64 billion through June 2001 and \$2.23 billion through June 2000.

¹ Note that the base for calculating the percent of funds obligated is the sum of the new obligation authority received during the fiscal year for these programs plus any unused obligation authority carried forward from previous years. © 2001 American Road and Transportation Builders Association 3
